Made in Germany

head office address

Street of jasmins (next to the French
cultural center) - 4000 Sousse
-TUNISIA

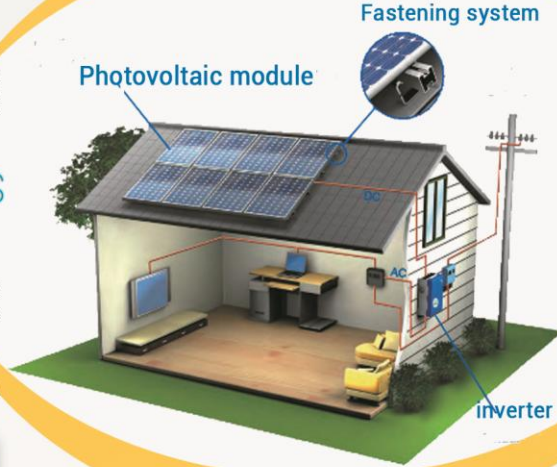

We offer the best solutions for photovoltaic renewable energies...

In support of our solar engineering department, our company supports its customers on all phases of the project from design to maintenance of the photovoltaic installation

How does photovoltaics work?

A photovoltaic system consists of modules. These generators transform directly solar energy into electricity.

One or more inverters convert the direct current produced in electricity.

Your production will be deducted from your bill!

The amount of energy you generate by your photovoltaic system will be fed into the power grid and deducted from your annual consumption.

You can save up to 100% on your electricity bills.

ALTERNATIVE ENERGY SYSTEMS OFFER YOU:

- 10 year guarantee for photovoltaic modules
- 5 years manufacturers warranty for modules
- Qualified technical team
- subsidies up to 150000 TD for residential installations and 20% for commercial installations with a ceiling of 100 000 TD..
- Partnership with major suppliers and global research offices

AES provides a wide range of high performance products manufactured by major global suppliers and high-quality services thanks to its skilled technical team!
